The brief structure and flow are as follows:

The Bank (or its agent) is also authorized by the Customer to conclude sale and purchase transactions that will be performed afterwards and to take possession of the Commodity (if requested by the Customer).

2. The Bank (or its agent) then sells the Commodity to the Customer at the Selling Price based on Murabahah concept (comprising of Purchase Price and disclosed profit margin), to be paid on deferred basis. The Customer is now the owner of the Commodity upon acceptance by the Bank (or its agent).
3. The Bank (or its agent) upon instruction by the Customer, sells the Commodity to other supplier, on cash basis for disbursement purpose.
4. The deferred Selling Price is payable by the Customer on lump sum or instalment basis based on the agreed tenure and payment schedule to be issued by the Bank from time to time.
